Write a program to implement insert operation on a red-black tree. During insertion, appropriately show how recoloring or rotation operation is used.

```
void RBTREE::insert (const int &data)
{
```

```
    Node *pt = new Node (data);
```

```
    root = BSTInsert (root, pt);
```

```
    fixViolation (root, pt);
```

```
}
```

BSTInsert () :-

```
Node * BSTInsert (Node * root, Node * pt)
```

```
{
    if (root == NULL)
        return pt;
```

```
    if (pt->data < root->data)
```

```
{
```

```
        root->left = BSTInsert (root->left, pt);
```

```
        root->left->parent = root;
```

```
}
```

```
    else if (pt->data > root->data)
```

```
{
```

```
        root->right = BSTInsert (root->right, pt);
```

```
        root->right->parent = root;
```

```
}
```

IA

y True

```
return root;
```

```
}
```

```
void RBTREE::fixViolation(Node * &root,
                           Node * &pt)
```

```
{
```

```
Node * parent-pt = NULL;
```

```
Node * grand-parent-pt = NULL;
```

```
while((pt != root) && (pt->color != BLACK)
      && (pt->parent->color == RED))
```

```
{
```

```
parent-pt = pt->parent;
```

```
grand-parent-pt = pt->parent->
parent;
```

```
if (parent-pt == grand-parent-pt
    -> left)
```

```
{
```

```
Node * uncle-pt = grand-parent-pt
-> right;
```

```
if (uncle-pt != NULL &&
    uncle-pt->color == Red)
```

```
{
```

```
grand-parent-pt->color = Red;
```

```
parent-pt->color = Black;
```

```
uncle-pt->color = Black;
```

```
pt = grand-parent-pt;
```

```

T. Triveni

Trivially

```
else  
{
```

```
    if (pt == parent->pt -> right)
```

```
    {  
        rotateLeft (root, parent->pt);  
        pt = parent->pt;  
        parent->pt = pt -> parent;  
    }
```

```
    rotateRight (root, grand-parent->pt);
```

```
    swap (parent->pt -> color, grand-parent->pt  
          -> color);  
    pt = parent->pt;
```

```
}
```

```
}
```

```
void RBTREE::rotateLeft (Node * &root, Node  
                          * &pt)
```

```
{
```

```
    Node * pt-right = pt -> right;
```

```
    pt -> right = pt -> right -> left;
```

```
    if (pt -> right != NULL)
```

```
        pt -> right -> parent = pt;
```

```
pt-right
```

```
    pt-right -> parent = pt -> parent;
```
